Keeping Track of Changes: Version Control and "Diff" Tools

- No easy way to track changes in Excel
- CVS or SVN version control could work on excel files
- No "diff" or "XXdiff" for excel to compare changes
- Limited search of the internet for low cost add-ins that perform these functions, must have free trial downloads
- Avoided large and costly systems that track all MS office file types
 - This might be useful for project (i.e. contracts)

Compare Suite

- This tool must convert to text, them make the comparison
 - As such not very useful
- Nothing further to say
- <u>http://www.comparesuite.com/download.htm</u>
- <u>http://www.comparesuite.com/solutions/compare_utilities_review/compare-files-excel.htm</u>

DiffEngineX

- DiffEngineX by Florence software
- Liked this tool
- Exports difference report
- <u>http://www.florencesoft.com/index.html</u>
- Works on formula or value
- Output report of changes
- Tested on NGAO WFE
- Cost \$89

Synkronizer

- Synkronizer by XL Consulting
- http://www.synkronizer.com/
- Works on excel (value or formula) and VBA
- Most expensive \$100-\$200 euro
- Nice product
- Tested on NGAO WFE

EasyVersionControl

- Excel version control tool
- http://www.easyversioncontrol.com/
- Lock up excel files, password control
- Notify user if using old "version"
- Only need one "master" or "publisher" license (\$100)
- Track if files have changed

• Any questions?
