PFICS meeting - November 20, 2012

Attending: Mike, Hrand, Reed, Dan

- There will be a meeting next week, Mike will run it

- Documentation
        - Drafts to be completed by Dec. 5th, pass between software team
        - Drafts to project by Dec. 12th
        - Peer review Dec. 19th @3pm for two hours

        Progress
        - Reed hasn't made much on requirements documents but has a plan
        - Mike working on schedule, design document, will discuss with Reed
        - Hrand working on design document
        - Rob working on test document

- ICD
        - Discussion of Hrand's document, details of communication between PFICS and
MPS
        - Format of data

- Computers
        - May work things out to be on a single computer
        - JPL will have three computers for development, will deliver next year
        - PFICS will probably purchase the same computer for development

- Timing results from Craig were discussed: the situation is better but still not optimal

- Software for testing, I&T
        - Start making a real plan for software for testing over the summer

        - Initial working system sometime in May, refinements continue through August
