Discussion Topics

- Estimate ZTF survey efficiency
    - Start off by Uli's talk
- How to implement this at IPAC? Additional resources?

- How to improve communication within ZTF project --- newsletter? Telecon? Website? Twiki? Slack?

    - SRK suggestions
        - Set up topical SWGs
        - Each SWG to send in a 1-page report every nn weeks (nn=1,2,3,4?)
        - Newsletter is compilation of these reports with some editorial

- How are ZTF events named? Where?

Action items from yesterday's discussion

- Finalize and send out announcement of next 3 team meetings (Yan)
- Nugent's write up on fake injection simulation work
- Mario's write up on the job description of the communication coordinator (rotating)
- Decision on the means of communication (Brady)
- Announcement and google doc on science working groups & interests (Goobar)
- Call for SEDM science projects (Goobar)

Topics for discussion

- How are ZTF events named? Where?

which threshold to attach ZTF name to an event? Events without ZTF names could still be real. Events with ZTF names are highly reliable. How do events not saved by IPAC as ZTF events get ZTF names? Allow manual saving in IPAC pipeline?? ZTF name convention?? LSST ID example? Nov, 2017

Topics for discussion

- What are the working groups?
  - Pipeline group (Frank) --- Every Tuesday 1pm
  - RealBogus & ML (Ashish) --- Bi-Thursday 2pm
  - Alert stream (ZADS) & Marshal (Eric & Cenko)
  - Engineering commissioning (Dekany) – Wed 10am PDT
  - Science validation (Graham) – bi-weekly Monday 9am PDT
  - Calibration group (Jakob) - bi-weekly ???
  - Fake njection simulation (Uli & Lin)
